## sensorimotor temporal tapping style

red and green circles in this diagram tell you exactly,
which variable at which timestep is assigned
the model input X and target Y

inf. propagation ⟶

pred. propagation ⟶

Block diagram style

$$F_p$$

$\hat{e}_t$

$s_t + \hat{e}_t$

RefArc
Body
World

e_t

only need this line
when sys is kinematic

g_t

s_t

t = t + 1

here the time increment happens,
which makes sense, since world
has sent new information.
